Trademark Protection

How can I insure that my patent or trademark is protected internationally?

U.S. patents only protect your invention in the United States. To protect your invention internationally you must file applications in each country where you seek protection. The same goes for trademarks. International filings can be quite complicated you may want to consult with a registered patent attorney/agent.

EXHIBIT 002: USPTO "one-size-fits-all" Service Mark / Trademark.

Service Mark

I'm interested in registering a Service Mark but noticed there are two types of applications. What are the differences?

There is only one application for either a service mark or a trademark in the electronic trademark filing system at the USPTO website. You are encouraged to file electronically if possible. If you are looking at paper forms, the information required for a trademark and a service mark is basically the same - only the terminology differs slightly. If you are filing a paper application, you should file the service mark application if you are applying for a service mark just to keep things from getting confusing. But it's best to use the "one-size-fits-all" application for filing either a trademark or service mark that's available on line.
